

2017-2018 Immunology Seminar Series

12:00 – 1:00 PM, Scaife Auditorium 5

Contact: Jesse Rosenthal, jrosenthal@pitt.edu, 412-648-7050

SEPTEMBER

7 – Wajahat Mehal, MD, PhD, Yale University

“Sterile Inflammation in the Liver”

14 – Geoffrey Camirand, PhD, University of Pittsburgh

“Visualization of Treg suppressor function within non-lymphoid tissues”

21 – NO SEMINAR – Rosh Hoshanah

28 – NO SEMINAR – Department Retreat

OCTOBER

5 – EBERLY LECTURE – Klaus Rajewsky, MD, Max Delbrück Center for Molecular Medicine

“Signals Controlling Normal and Malignant B Cells”

12 – Charles Drake, MD, PhD, Columbia University

“Immunotherapy for GU Cancers”

19 – NO SEMINAR – Science 2017

26 – Shruti Naik, MD, Rockefeller University

“Memory of Inflammation in Epidermal Stem Cells”

NOVEMBER

2 – Mike Rosenblum, MD, PhD, University of California, San Francisco

“Regulatory T Cells in Skin – From Mice to Man”

9 – NO SEMINAR

16 – Robert Lafyatis, MD, University of Pittsburgh

“Expansion of pro-fibrotic fibroblasts and macrophages in idiopathic pulmonary fibrosis”

23 – NO SEMINAR – THANKSGIVING

30 – Eugene Oltz, PhD, Washington University in St. Louis

“Normal and Pathogenic Regulatory Circuits Governing Gene Expression in Human Lymphoid Cells”

DECEMBER

7 – Michael Cancro, PhD, University of Pennsylvania

“New subsets, new checkpoints: Expanding roles for Tbet+ B cells in health and disease”

14 – Greg Delgoffe, PhD, University of Pittsburgh

2017-2018 Immunology Seminar Series

12:00 – 1:00 PM, Scaife Auditorium 5

Contact: Jesse Rosenthal, jrosenthal@pitt.edu, 412-648-7050

“Fueling cancer immunotherapy through metabolic intervention”

21 – NO SEMINAR – WINTER BREAK

28 – NO SEMINAR – WINTER BREAK

JANUARY

4 – NO SEMINAR – WINTER BREAK

11 – Ageliki Tsagaratou, PhD, La Jolla Institute for Allergy and Immunology

“The Role of TET Proteins and 5-hydroxymethylcytosine in T cell Development and Disease”

18 – Ashley Moseman, PhD, National Institutes of Health

“Mechanisms of TET Mediated Regulation of Immune Function and Malignant Transformation”

25 – Melody Zeng, PhD, University of Michigan

“Gut Microbiota-induced IgG in Host Defense and Neonatal immunity”

FEBRUARY

1 – NO SEMINAR

8 – Yuefeng (Tony) Huang, PhD, National Institutes of Health

“Lung Immunity Originating in Gut: The Migratory Responses of Innate Lymphoid Cells”

15 – Thomas Hofer, PhD, German Cancer Research Center

“A dynamic framework for hematopoiesis”

22 – NO SEMINAR

MARCH

1 – Barbara Kee, PhD, University of Chicago

“Transcriptional control of natural killer cell and innate lymphoid cell fate”

8 – Basilia Zingarelli, PhD, University of Cincinnati

“Mitochondrial quality control in multiple organ failure in sepsis and trauma”

15 – Navdeep Chandel, PhD, Northwestern University

22 – EBERLY LECTURE – Arlene Sharpe, MD, PhD, Harvard University

“Multifaceted Functions of the PD-1 Pathway”

29 – Maria Grazia Roncarolo, MD, Stanford University

“Cell therapy with T regulatory cells: Where we are and what comes next?”

2017-2018 Immunology Seminar Series

12:00 – 1:00 PM, Scaife Auditorium 5

Contact: Jesse Rosenthal, jrosenthal@pitt.edu, 412-648-7050

APRIL

- 5 – Thomas Kupper, PhD, Harvard University
- 12 – Michail Lionakis, MD, ScD, National Institute of Health
“Of mice and humans: Host control of candidiasis”
- 19 – Gary Kohanbash, PhD, University of Pittsburgh
- 26 – Tania Watts, PhD, University of Toronto

MAY

- 3 – NO SEMINAR – AAI Travel
- 10 – EBERLY LECTURE – Robert Schreiber, PhD, Washington University in St. Louis
- 17 – Ari Melnick, MD, Cornell University
- 24 – Steven Reiner, MD, Columbia University
- 31 – Facundo Batista, PhD, Harvard University
